

The 64th

National Shorthorn **SHOW & SALE**

13TH & 14TH JUNE 2023

2022 CHAMPION BULLS

Grand Champion Bull;
Macquarie Williams Memorial Trophy
Sponsored by the Land:
K.O Meteor Roulette R133
Exhibited by KO Shorthorns

Champion Unled Bull; Caskiben Voyager R50
Exhibited by CBN Pastoral

Grand Champion Female: Sprys ES Primrose S14
Exhibited by Sprys Shorthorns & AJM Shorthorns

Junior Champion Bull: K.O PNX Resolution R152
Exhibited by KO Shorthorns

Senior Champion Bull: K.O Meteor Roulette R133
Exhibited by KO Shorthorns

John Horn Memorial Trophy:
Ronelle Park Rolls Royce R10
Exhibited by
Ronelle Park Shorthorns sold to
Falls Family of Malton Shorthorns

The 64th

National Shorthorn SHOW & SALE

13TH & 14TH JUNE 2023

Dubbo Showground

- 103 Led Bulls • 30 Unled Bulls •
- 19 Special Females • Genetics Packages •

All animals vet inspected. Bulls: semen tested, Zoetis UltraVac 7:1, Vibrovax & Pestiguard. **Females:** are PI Negative, Ultravac 7:1. **DNA Testing:** Sire Identification is compulsory. Shorthorn Beef provides exemptions. Affected lots are identified as 'Exempt'. Myostatin & Homozygous Poll Status is recommended.

Tuesday 13th June 2023

Judging - 10.00am

Unled Bulls, Led Females, Led Bulls

Judge: Mr Lincoln Job,
Marellan Shorthorns, Emerald QLD

Wednesday 14th June 2023

Sale 10.00am

Bulls, followed by sale of females
Simulcast with
AuctionsPlus

Dinner: 6.30pm, 13th June 2023 at the Pastoral Hotel, Dubbo

THE STORY OF THOUSAND GUINEAS

The Shorthorn breed keeps the **oldest breed registry** in the world.

The story begins in the North East of England in the **18th century**, where Teeswater & Durham cattle breeds were being refined using selective breeding techniques by Charles and Robert Colling. This program would go on to give rise to one of the most highly sought-after beef cattle breeds in the world.

In 1810, a world record 1,000 Guineas was paid for a Foundation Sire of this Shorthorn breed. In 1825 the first registered Shorthorn cattle arrived in Australia, imported by Potter McQueen in Scone, NSW.

This bloodline would go on to be a key influencer in modern Shorthorn breeds. Today's Shorthorn cattle are noted for their **excellent meat quality and marble score**.

UNDERSTANDING EPDS

MATERNAL EPDS

CALVING EASE MATERNAL - CE

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT - MWWT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY - STAY

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY - DOC

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPDS

BIRTH WEIGHT - BW

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT - WW

Adjusted to 205 Days

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT - WW

Adjusted to 365 Days

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S - Adjusted to 475 Days

CARCASE WEIGHT - CW

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA - REA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcase fat thresholds for target markets.

YIELD GRADE - YG

Reported as expected differences in progeny average USDA Yield Grade scores.

Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual

USDA Yield Grade values.

Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE - MARB

Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE \$INDEX - API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

Tibial Hemimelia - TH

EPD's are updated monthly.

**For current data and further DNA explanation
please refer to the Shorthorn Beef website
www.shorthornbeef.com.au.**

INTRAMUSCULAR FAT % - RAW DATA

By Roger Evans, Bovine Scanning Services

In 2023 after extensive discussion with vendors, purchasers and industry representatives, the 2023 Dubbo National Shorthorn Show and Sale committee has voted to include raw scan data for Intramuscular Fat %.

Until now, the raw data presented for the sale has included age, weight, scrotal and scan data of Rump and Rib Fats and Eye Muscle Area (EMA). This data has been supplied to give the potential purchaser an indication of each animal's performance in relation to other animals in the sale, noting that raw data should only be compared between animals that are of the same age and exposed to the same environmental and nutritional regimes.

INTRAMUSCULAR FAT (IMF)

In 2023 raw data for IMF will be made available for the first time.

Intramuscular Fat is the fat that is located between the muscle cells within the muscles of an animal.

The Intramuscular Fat is measured by using real time ultrasound and is expressed as a IMF%. The IMF% is measured in the EMA to give a measurement of the level of IMF that is present in the muscle of the animal.

For example if an animal has an EMA of 120cm² with an IMF% of 6.8%, then its saying that of that 120cm² of EMA, then 6.8% of that muscle is IMF. The higher the IMF% the greater the chance of that animal having a higher level of marbling upon slaughter.

An animal's ability to express IMF is dependent on many factors.

These include:

- Genetic make up of the animal, if the animal does not have the genetic ability to deposit IMF then extra feed will not increase the level of IMF in the muscle.
- Age of the animal, the older the animal the greater the level of expression of IMF. Bulls at 24 months of age will exhibit more IMF than a bull at 16 months of age due to increased physiological maturity.
- Nutrition, the greater the level of nutrition the animal is exposed to during its lifetime will increase the level of expression of IMF, this is especially important during pregnancy.
- Animal health, the healthier the animal is during its lifetime the greater the chance of the expression of IMF.

Intramuscular Fat is the fat that solidifies upon slaughter to give us the expression of marbling within the beef carcass. Intramuscular Fat is made up of many different chemical compounds (unlike subcutaneous and seam fats) that all have different

melting points. This is why the carcass needs to be chilled down to between 3-5 degrees Celsius to allow maximum expression of IMF to give the most accurate marble score. It is VERY IMPORTANT to note that an IMF% is NOT the same as a MARBLE SCORE, ie an IMF% of 7.1% is not a marble score of 7.1.

Even though Intramuscular Fat % is an indirect measure of the carcass trait marbling, by measuring cattle of the same age that are running on the same nutrition it is possible to identify sire and dam lines that do have the ability to produce and express more IMF.

So when taking into consideration the above mentioned factors, when using raw data, a bull's IMF% should only be directly compared to other bulls if they are within a two month age range and on the same nutrition, ie animals of the same age from the same herd, (as seen presented at on property sales). If trying to compare between herds then it should be done with EXTREME CAUTION. It would also be advantageous to talk to a representative from the studs to see how the bulls ranked compared to all the bulls in his age group if scanned previously for genetic evaluation (EPD's). To take this one step further it would be advantageous to see how the bull's sire group ranked in relation to the average for the group, the higher the average for the sire's progeny within the group compared to the group average then the greater the chance of bulls from that sire producing higher IMF in their progeny.

It would be strongly advised to also look at the EPD for individual bulls when selecting for IMF as this takes into account the animal's performance in relation to his peers for that year, along with the performance of his relatives within the Shorthorn population. The EPD can also be derived along with the addition of genetic material (genomics) which gives information of the what genes are present within the animal. If a bull has high performance within his peers as well as the desirable genes for IMF then there is a greater chance of that bull having increased IMF% and also passing that onto to his progeny.

Increasing IMF in a herd of cattle is a long term process. IMF has a lower level of heritability compared to other carcass traits. By selecting bulls that have a higher EPD for Marbling as well as above average IMF% performance compared to their peers of the same age, this will increase the chance of those bulls passing that onto their progeny over the same set of cows.

If anyone has any questions please do not hesitate to contact the committee or myself for further advice.

INCREASE PROFIT WITH BETTER RATION CONTROL

NEW PRODUCT FEATURE! Lower Adjuster Cam

This new feature is rotated so you can position the Lower Adjuster at the exact position for an accurate ration. This ensures that feeders are set consistently by all users.

Changing the Lower Adjuster is made quicker and easier as the rotating motion of the cam easily closes the Lower Adjuster.

Lower Adjuster Cams will be standard on all new Advantage Feeders Grain Feeders purchased from January 19.

Lower Adjuster Cams can be retrofit to any Advantage Feeders HD model or the superseded NGF models for \$100+GST per kit. Call us to order, FREE postage.

ADVANTAGE FEEDERS

INCREASE GROWTH RATES BY CREEP FEEDING

Creep feeding transforms infant calves ability to convert pasture and other forages from birth resulting in higher growth rates of your stock

Want to save?

Ask us how you can be rewarded as a loyal customer, including retrospective discounts on select previous purchases!

Want to check out how our feeders could assist your farm production outcomes? Check out our online Information Sheet

ADVANTAGE FEEDERS

BENEFITS OF CREEP FEEDING

- ✓ Increase growth rates
- ✓ Sell stock earlier at higher market prices
- ✓ Reduce the strain on cows to produce
- ✓ Convert more pasture before it deteriorates
- ✓ Join young stock earlier
- ✓ Wean earlier, providing flexibility in droughts

BENEFITS OF USING ADVANTAGE FEEDERS

- ✓ Creep Gates restrict mature stock from supplement
- ✓ 3-Way Restriction System controls livestock consumption
- ✓ Stainless steel troughs and gal dipped skids
- ✓ Use the feeders year-round to grow out weaners
- ✓ Mineral Attachments & other accessories available
- ✓ 5-year warranty on ALL feeders

ABOUT

Established in 2008, we are an innovative boutique accounting firm offering a superior level of service to our clients.

We specialise in various industries but have a personal passion for both the farming industry and horse and harness racing industry.

We ensure that our team offers a high level of service, value for money and accessibility to our assistance all year round

MEMBERS OF THE NATIONAL SHORTHORN SHOW AND SALE COMMITTEE INC.

T Johnstone (President), L Collins (Vice President), M Walker (Junior Vice President), A Falls (Secretary), W Ham (Treasure), R Evans (Public Officer), J Brown (Ray White GTSM), L Cowper (JBS), P Jameson (Elders), I Lambell, R Morris, D O'Connor, J Tink and E Williams.

LIFE MEMBERS OF THE NATIONAL SHORTHORN SHOW AND SALE COMMITTEE INC.

I Lambell and L Job.

SPECIAL NOTICE TO BUYERS AND AGENTS

NO VERBAL INSTRUCTIONS CAN BE ACCEPTED

1. Buying Number System - A buyers number system will be in operation at this sale. All prospective purchasers must register at the Agent's Office and obtain a buyer's number prior to commencement of sale.
2. GST - GST will be added on the fall of hammer to purchase price. You will be invoiced for purchase price plus GST.
3. NLIS - All cattle will have their NLIS buttons and will be transferred to successful purchasers' number by selling agent at completion of sale.
4. Disclaimer - The Committee and/or their agents do not give any warranty as to errors and omissions if any in these particulars which they believe to be accurate when compiled. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.
5. Public Liability - Any person attending the sale does so at his/her own risk. All persons attending the sale release the Committee and vendors from all actions or demands due to any loss, death, damage or injury occurring on the premises. The Committee and vendors are not responsible and have no liability for any death, or injury to person or any loss of, or damage to any person attending the Show & Sale, their property or otherwise.
6. Indemnity - All persons attending the sale agree to indemnify the Committee and vendors from and against any liability, loss, damage, expense or claim which the Committee or vendor may incur, including to a third party, during or after the Show & Sale in all respects.
7. In the interest of buyers and to prevent the occurrence of mistakes, all instructions concerning the collection, delivery and trucking or shipping of cattle and insurance thereon must be given IN WRITING at the Company's Instruction office. Such instructions are to be signed by the buyer or their representative.
8. Agents may deliver any lots to other Agents if requested, but in such case the buyer is required to sign a delivery order.
9. When cattle are to be collected from other Agents, delivery orders are to be handed to the forwarding Agent by the buyer.
10. Instructions for dispatch of consignments comprising more than one owner must be signed by each buyer; no instructions will be considered complete until all have signed.
11. Insurance - Cover can be effective immediately after instructions are given.

12. VENDORS GUARANTEE ON BULLS

1. It is a condition of sale that Vendors warrant that all bulls are to be sold as fertile and capable of natural service within 6 months of the date of the sale;
2. The Vendors shall refund to the Purchaser the purchase price paid (excluding any costs or expense of the purchaser) upon the Purchaser providing to the Vendor within 6 months of the sale date:-
 - a) A report from a licensed veterinarian certifying that in his or her opinion:-
 - i. The bull is infertile or incapable of natural service;
 - ii. There is no evidence that the bull has suffered any injury or illness subsequent to

being sold to the Purchaser which could affect his breeding ability

- b) A Statutory Declaration from the Purchaser warranting that in the opinion of the Purchaser the facts stated in the veterinarian's report are true and correct.

13. VENDORS GUARANTEE ON FEMALES

1. It is a condition of all sales that Vendors warrant that all females catalogued and sold as unjoined are fertile to natural service within 12 months of sale;
2. The Vendors shall refund to the Purchaser the purchase price paid (excluding any costs or expense of the purchaser) upon the Purchaser providing to the Vendor within 12 months of the sale date:-
 - a) A report from a licensed veterinarian certifying that in his or her opinion:-
 - i. There is no evidence that the female suffered any injury or illness subsequent to being sold to the Purchaser which could have affected her breeding ability; and
 - ii. There is no evidence that the female has been subjected to embryo transfer procedures.
 - b) A Statutory Declaration from the Purchaser warranting that in the opinion of the Purchaser the facts stated in the veterinarian's report are true and correct.

14. GENETIC PACKAGES

1. Entries can be in the form of:
 - a. The sale of an embryo flush consisting of at least 5 freezable embryos being A Grade or B Grade. The flush must be completed within 12 months of the Show & Sale. All associated costs are the responsibility of the purchaser. To be sold per package.
 - b. The sale of embryo packages collected prior to the Show and Sale with each package consisting of a minimum of 5 frozen embryos being A Grade or B Grade. To be sold per embryo.
 - c. The sale of semen packages collected prior to the Show and Sale. Must be of Commercial Standard. offered in lots of either 5, 10 or 20 straws. To be sold per straw.
 - d. The sale of a PTIC recipient past 90 days from implantation dates (accompanied with veterinarian certificate) of known joining details of sire and dam. To be sold per package.
- 2) The collection of embryos and semen MUST be performed by an accredited Technician. Documentation supporting this is the responsibility of the vendor.

OUTSIDE AGENTS REBATE

A 2% rebate is offered by the vendors to all outside agents who register in writing 24 hours prior to the sale, purchase and pay within the terms of settling agent.

FREIGHT REBATE

\$1.00 per km, to a maximum of \$500 for each purchaser who buys 4 or more live animals at auction. Vendors responsible to transport bulls and females to Dubbo.

Insurance that is no bull

Running a stud cattle station comes with risks and challenges that are often out of your control.

Weather conditions, staff issues, stock prices and competition from overseas can all impact your business.

That's where we come in.

Gallagher has a long history of providing insurance and risk management solutions that are a great fit for cattle breeders.

Put our insurance advice and solutions to the test and ask our experienced farm team about how we can help you build the confidence to handle whatever comes next.

ARE YOUR YOUNG CATTLE PREPARED FOR DAYCARE?

Feedlots and saleyards are like daycare centres. When young cattle from different farms are mixed together, Bovine Respiratory Disease (BRD) becomes a serious issue. That's why many feedlots want cattle prevaccinated with Bovilis® MH+IBR – the only vaccine that protects against the two key organisms that cause BRD.

AUSTRALIA'S ONLY DUAL PROTECTION BRD VACCINE

BECOME A SUPPLIER TO THE AWARD-WINNING BEEF PROGRAM

The Thousand Guineas beef program is the only dedicated Shorthorn beef brand in the Australian market.

JBS, in partnership with The Shorthorn Society of Australia and accredited livestock producers, combines these superior genetics with grain finishing expertise and state-of-the-art processing facilities to produce a unique beef product with exquisite tenderness and flavour.

JBS is always looking to introduce new suppliers into the program. The brand has grown from strength to strength with meat wholesalers, butcher shops and restaurants around the world recognising the superiority of this beef.

Breed Type	Shorthorn (verified and accredited)
Weight	380kg - 520kg (0-4 teeth)
Weight	250kg minimum (0 teeth only)

Cattle must be pre-vaccinated with Bovilis MH+IBR before delivery to Prime City, or Caroon feedlots.

HOW LONG ARE YOUR CATTLE PROTECTED AGAINST PULPY KIDNEY?

**HAVE A CLOSER LOOK
AT THE VACCINE LABELS ^{*^}**

TASVAX® 5 IN 1

12 MONTHS

JAN > FEB > MAR > APR > MAY > JUN > > DEC

3 MONTHS

***Don't get caught short on
pulpy kidney protection!***

Toll Free **1800 226 511**
www.coopersanimalhealth.com.au

^{*} Tasvax 5 in 1 provides 12 months duration of immunity to pulpy kidney in cattle after a sensitiser dose and booster. Annual boosters will be required for full protection against pulpy kidney.

[^] Cattle: The two basic doses of Ultravac 5 in 1 should provide effective immunity against enterotoxaemia (pulpy kidney) for three months. Booster doses are therefore necessary to maintain immunity against enterotoxaemia (pulpy kidney) in cattle and should be given at appropriate intervals according to local and seasonal conditions.

SPRYS LOTS OF CLASS S57
FUTURITY ALTHEAS CLASSY RUBY
FUTURITY ALTHEA'S RUBY 2ND

Comments: A versatile, soft bull to use on heifers and cows. S41 should breed females with positive maternal traits. His dam leaving us with exceptional progeny.

YANCO AGRICULTURAL HIGH SCHOOL

Yanco Agricultural High School is a co-educational, fully residential Public high school, specialising in Agriculture. The school provides a quality secondary education in a historic rural setting.

Located in the NSW Riverina the school has a proud tradition of promoting positive values and developing confident, capable and community-minded students. The school is a selective government school with priority given to isolated students.

This unique educational institution provides a broad, well-balanced education. The school has 280ha, including 180ha of intensive irrigation and dry land agriculture, as well as 60ha of natural bushland bordered by the Murrumbidgee River.

With state-of-the-art resources, farm and hostel, the school provides an all-round education for students in a stimulating and caring environment. The school focuses on the development of the whole person through the curriculum, extracurricular activities and residential experiences, ensuring that students become well equipped to take their place in life.

In addition to the study of Agriculture in Years 7-12, the school offers Junior and Senior Courses in Equine Studies, and Five Industry Framework Vocational Education Training courses including Certificate III in Agriculture. The Technology and Applied Science area is well resourced to provide students with the opportunity to produce major works of considerable magnitude.

The school has a White Suffolk Sheep Stud and Shorthorn Cattle Stud, which focus on breeding high-performing, commercially relevant animals and utilise technologies such as Electronic Identification, Genomics and Artificial Insemination to educate students on Sheep and Cattle Production and Marketing.

On School grounds students have access to tennis courts, a gymnasium, swimming pool, 10ha of sporting ovals, after-hours library, and resource center.

Students are encouraged to develop responsible leadership, personal integrity, and sportsmanship and to strive for excellence in academic, cultural, sporting and civic endeavors, in an environment conducive to learning, teaching and friendship.
