

The 65th
National Shorthorn
SHOW & SALE

11TH & 12TH JUNE 2024

2023 CHAMPIONS

**Grand Champion Bull,
Macquarie Williams Memorial Trophy:
Southern Cross Smokin Joe S208
Exhibited by Southern Cross Shorthorns**

**Champion Unled Bull: Leeds Koolie S23
Exhibited by Leeds Shorthorns**

**Grand Champion Female: AJM Cherry T110
Exhibited by A & J Morris**

**Junior Champion Bull: Ronelle Park Slurpie S29
Exhibited by Ronelle Park**

**Senior Champion Bull: Southern Cross Smokin Joe S208
Exhibited by Southern Cross Shorthorns**

**John Horn Memorial Trophy:
Ronelle Park Slurpie S29
Exhibited by Ronelle Park sold to
the Falls Family of Malton Shorthorns.**

The 65th
National Shorthorn
SHOW & SALE

11TH & 12TH JUNE 2024

- 116 Led Bulls • 20 Unled Bulls •
- 11 Special Females • 7 Genetics Packages •

All animals are vet inspected.

DNA Testing: Sire Identification is compulsory. Myostatin & Homozygous Poll Status is recommended. Lots which have been blooded for tick fever and where semen or embryos are retained have been identified in the respective Lots.

Bulls: Semen tested, Zoetis UltraVac 7:1, Vibrovax & Pestiguard.

Females: Are PI Negative & Ultravac 7:1.

Tuesday 11th June 2024

Judging - 10.00am

Unled Bulls, Females & Led Bulls

Judge: Mr Spencer Morgan,
The Grove Shorthorns, Condamine QLD

Wednesday 12th June 2024

Sale 10.00am

Bulls, followed by sale of
Females & Genetic Packages
Simulcast with **AuctionsPlus**

Dinner: 6.30pm, 11th June 2024 at the Pastoral Hotel, Dubbo

90 Bulls sold - Gross \$966,960 - Average \$10,744

FEMALES

14 sold - Gross \$116,004 - Average \$8,286 - Top Price \$18,000 (twice)

GENETIC PACKAGES

7 sold - Gross \$59,800 - Average \$8,543 - Top Price \$8,400

UNDERSTANDING EPDS

MATERNAL EPDS

CALVING EASE MATERNAL - CE

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT - MWWT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY - STAY

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY - DOC

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPDS

BIRTH WEIGHT - BW

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT - WW

Adjusted to 205 Days

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT - WW

Adjusted to 365 Days

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S - Adjusted to 475 Days

CARCASE WEIGHT - CW

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA - REA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcass fat thresholds for target markets.

YIELD GRADE - YG

Reported as expected differences in progeny average USDA Yield Grade scores.

Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual

USDA Yield Grade values.

Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE - MARB

Reported as the differences in actual carcass marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE \$INDEX - API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

Tibial Hemimelia - TH

EPD's are updated monthly.

**For current data and further DNA explanation
please refer to the Shorthorn Beef website
www.shorthornbeef.com.au.**

INTRAMUSCULAR FAT % - RAW DATA

By Roger Evans, Bovine Scanning Services

In 2023 after extensive discussion with vendors, purchasers and industry representatives, the 2023 Dubbo National Shorthorn Show and Sale committee has voted to include raw scan data for Intramuscular Fat %.

Until now, the raw data presented for the sale has included age, weight, scrotal and scan data of Rump and Rib Fats and Eye Muscle Area (EMA). This data has been supplied to give the potential purchaser an indication of each animals performance in relation to other animals in the sale, noting that raw data should only be compared between animals that are of the same age and exposed to the same environmental and nutritional regimes.

INTRAMUSCULAR FAT (IMF)

In 2023 raw data for IMF will be made available for the first time.

Intramuscular Fat is the fat that is located between the muscle cells within the muscles of an animal.

The Intramuscular Fat is measured by using real time ultrasound and is expressed as a IMF%. The IMF% is measured in the EMA to give a measurement of the level of IMF that is present in the muscle of the animal.

For example if an animal has an EMA of 120cm² with an IMF% of 6.8%, then its saying that of that 120cm² of EMA, then 6.8% of that muscle is IMF. The higher the IMF% the greater the chance of that animal having a higher level of marbling upon slaughter.

An animals ability to express IMF is dependent on many factors.

These include:

- Genetic make up of the animal, if the animal does not have the genetic ability to deposit IMF then extra feed will not increase the level of IMF in the muscle.
- Age of the animal, the older the animal the greater the level of expression of IMF. Bulls at 24 months of age will exhibit more IMF than a bull at 16 months of age due to increased physiological maturity.
- Nutrition, the greater the level of nutrition the animal is exposed to during its lifetime will increase the level of expression of IMF, this is especially important during pregnancy.
- Animal health, the healthier the animal is during its lifetime the greater the chance of the expression of IMF.

Intramuscular Fat is the fat that solidifies upon slaughter to give us the expression of marbling within the beef carcass. Intramuscular Fat is made up of many different chemical compounds (unlike subcutaneous and seam fats) that all have different

melting points. This is why the carcass needs to be chilled down to between 3-5 degrees Celsius to allow maximum expression of IMF to give the most accurate marble score. It is VERY IMPORTANT to note that an IMF% is NOT the same as a MARBLE SCORE, ie an IMF% of 7.1% is not a marble score of 7.1.

Even though Intramuscular Fat % is an indirect measure of the carcass trait marbling, by measuring cattle of the same age that are running on the same nutrition it is possible to identify sire and dam lines that do have the ability to produce and express more IMF.

So when taking into consideration the above mentioned factors, when using raw data, a bulls IMF% should only be directly compared to other bulls if they are within a two month age range and on the same nutrition, ie animals of the same age from the same herd, (as seen presented at on property sales). If trying to compare between herds then it should be done with EXTREME CAUTION. It would also be advantageous to talk to a representative from the studs to see how the bulls ranked compared to all the bulls in his age group if scanned previously for genetic evaluation (EPD's). To take this one step further it would be advantageous to see how the bulls sire group ranked in relation to the average for the group, the higher the average for the sires progeny within the group compared to the group average then the greater the chance of bulls from that sire producing higher IMF in there progeny.

It would be strongly advised to also look at the EPD for individual bulls when selecting for IMF as this takes into account the animals performance in relation to his peers for that year, along with the performance of his relatives within the Shorthorn population. The EPD can also be derived along with the addition of genetic material (genomics) which gives information of the what genes are present within the animal. If a bull has high performance within his peers as well as the desirable genes for IMF then there is a greater chance of that bull having increased IMF% and also passing that onto to his progeny.

Increasing IMF in a herd of cattle is a long term process. IMF has a lower level of heritability compared to other carcass traits. By selecting bulls that have a higher EPD for Marbling as well as above average IMF% performance compared to their peers of the same age, this will increase the chance of those bulls passing that onto their progeny over the same set of cows.

If anyone has any questions please do not hesitate to contact the committee or myself for further advice.

NEW SCIENTIFIC DATA

proving the efficiency of our unique formulation and water application method.

Talk to us today about the exciting results achieved

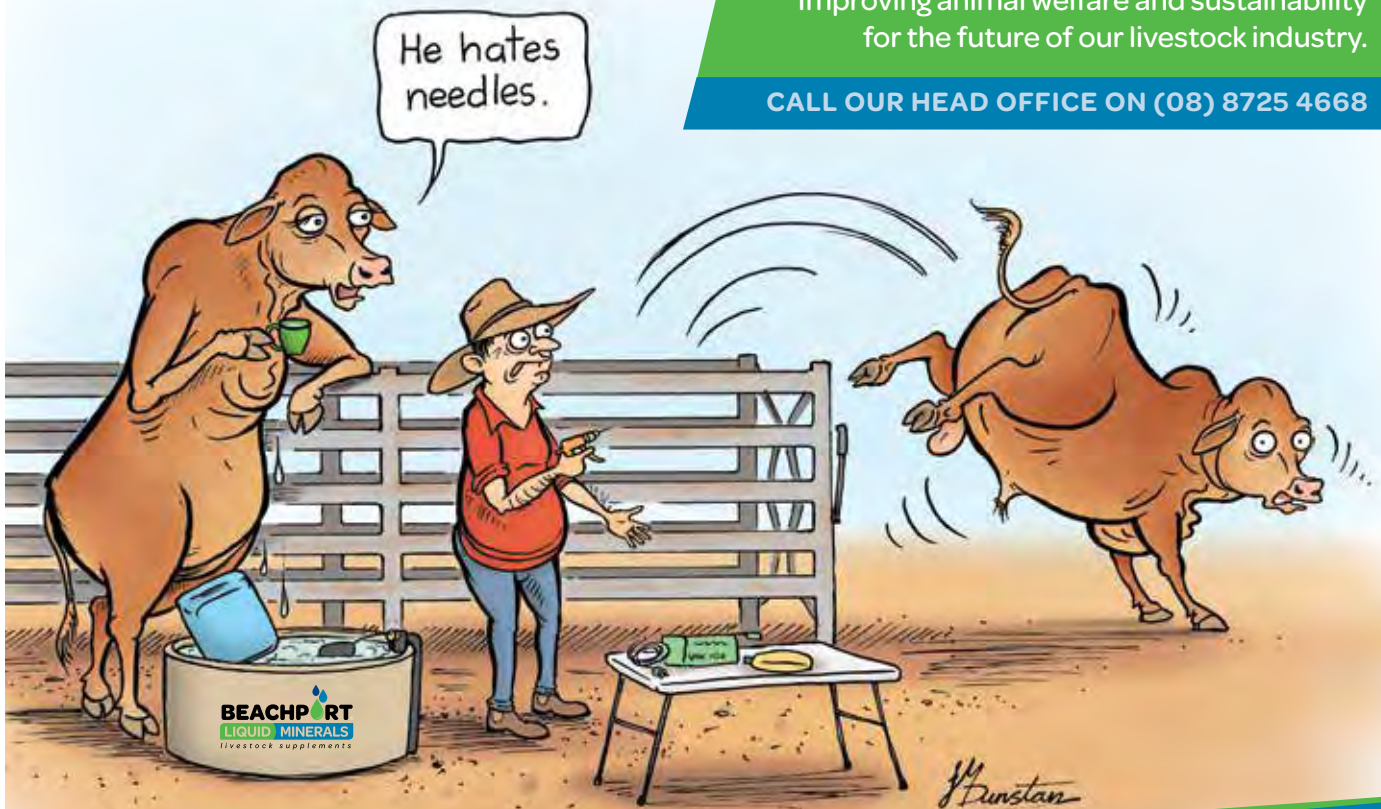

BEACHPORT
LIQUID MINERALS
livestock supplements

-  Unique and powerful concentrate made up of trace elements, amino acids and natural electrolytes.
-  Simple, cost-effective and time-saving yearly supplements with just one dose every 6 weeks.
-  Proven water application method, absorbed into the bloodstream via the small intestine.

THERE IS A BETTER WAY!

Improving animal welfare and sustainability for the future of our livestock industry.

THE ANNUAL GENERAL MEETING of Shorthorn Breeders to elect the Dubbo National Shorthorn Show and Sale Committee will be held on Friday 11 October 2024 at 9.00am at the Dubbo RSL Memorial Club.

MEMBERS OF THE NATIONAL SHORTHORN SHOW AND SALE COMMITTEE INC.

T Johnstone (President), L Collins (Vice President), M Walker (Junior Vice President), A Falls (Secretary), W Ham (Treasure), R Evans (Public Officer), P Jameson (Elders), I Lambell, D O'Connor, J Tink and E Williams.

LIFE MEMBERS OF THE NATIONAL SHORTHORN SHOW AND SALE COMMITTEE INC.

I Lambell and L Job.

SPECIAL NOTICE TO BUYERS AND AGENTS

NO VERBAL INSTRUCTIONS CAN BE ACCEPTED

1. Buying Number System - A buyers number system will be in operation at this sale. All prospective purchasers must register at the Agent's Office and obtain a buyer's number prior to commencement of sale.
2. GST - GST will be added on the fall of hammer to purchase price. You will be invoiced for purchase price plus GST.
3. NLIS - All cattle will have their NLIS buttons and will be transferred to successful purchasers' number by selling agent at completion of sale.
4. Disclaimer - The Committee and/or their agents do not give any warranty as to errors and omissions if any in these particulars which they believe to be accurate when compiled. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.
5. Public Liability - Any person attending the sale does so at his/her own risk. All persons attending the sale release the Committee and vendors from all actions or demands due to any loss, death, damage or injury occurring on the premises. The Committee and vendors are not responsible and have no liability for any death, or injury to person or any loss of, or damage to any person attending the Show & Sale, their property or otherwise.
6. Indemnity - All persons attending the sale agree to indemnify the Committee and vendors from and against any liability, loss, damage, expense or claim which the Committee or vendor may incur, including to a third party, during or after the Show & Sale in all respects.
7. In the interest of buyers and to prevent the occurrence of mistakes, all instructions concerning the collection, delivery and trucking or shipping of cattle and insurance thereon must be given IN WRITING at the Company's Instruction office. Such instructions are to be signed by the buyer or their representative.
8. Agents may deliver any lots to other Agents if requested, but in such case the buyer is required to sign a delivery order.
9. When cattle are to be collected from other Agents, delivery orders are to be handed to the forwarding Agent by the buyer.
10. Instructions for dispatch of consignments comprising more than one owner must be signed by each buyer; no instructions will be considered complete until all have signed.
11. Insurance - Cover can be effective immediately after instructions are given.

12. VENDORS GUARANTEE ON BULLS

1. It is a condition of sale that Vendors warrant that all bulls are to be sold as fertile and capable of natural service within 6 months of the date of the sale;
2. The Vendors shall refund to the Purchaser the purchase price paid (excluding any costs or expense of the purchaser) upon the Purchaser providing to the Vendor within 6 months of the sale date:-
 - a) A report from a licensed veterinarian certifying that in his or her opinion:-
 - i. The bull is infertile or incapable of natural service;
 - ii. There is no evidence that the bull has suffered any injury or illness subsequent to being sold to the Purchaser which could affect his breeding ability.

- b) A Statutory Declaration from the Purchaser warranting that in the opinion of the Purchaser the facts stated in the veterinarian's report are true and correct.

13. VENDORS GUARANTEE ON FEMALES

1. It is a condition of all sales that Vendors warrant that all females catalogued and sold as unjoined are fertile to natural service within 12 months of sale;
2. The Vendors shall refund to the Purchaser the purchase price paid (excluding any costs or expense of the purchaser) upon the Purchaser providing to the Vendor within 12 months of the sale date:-
 - a) A report from a licensed veterinarian certifying that in his or her opinion:-
 - i. There is no evidence that the female suffered any injury or illness subsequent to being sold to the Purchaser which could have affected her breeding ability; and
 - ii. There is no evidence that the female has been subjected to embryo transfer procedures.
 - b) A Statutory Declaration from the Purchaser warranting that in the opinion of the Purchaser the facts stated in the veterinarian's report are true and correct.

14. GENETIC PACKAGES

1. Entries can be in the form of:
 - a. The sale of an embryo flush consisting of at least 4 freezable embryos being A Grade or B Grade. The flush must be completed within 12 months of the Show & Sale. All associated costs are the responsibility of the purchaser. To be sold per package.
 - b. The sale of embryo packages collected prior to the Show and Sale with each package consisting of a minimum of 4 frozen embryos being A Grade or B Grade. To be sold per embryo.
 - c. The sale of semen packages collected prior to the Show and Sale. Must be of Commercial Standard. Offered in lots of either 5, 10 or 20 straws. To be sold per straw.
 - d. The sale of a PTIC recipient past 90 days from implantation dates (accompanied with veterinarian certificate) of known joining details of sire and dam. To be sold per package.
2. The collection of embryos and semen MUST be performed by an accredited Technician. Documentation supporting this is the responsibility of the vendor.
3. Genetic Packages Embryo calves DNA results must match the published joining in the catalogue. Testing and submission to the lab to occur prior to the calf being 6 months of age. If results do not match it is the Vendor's responsibility to resolve with the purchaser. DNA testing is the responsibility of the purchaser.

OUTSIDE AGENTS REBATE

A 2% rebate is offered by the vendors to all outside agents who register in writing 24 hours prior to the sale, purchase and pay within the terms of settling agent.

FREIGHT REBATE

\$1.00 per km, to a maximum of \$500 for each purchaser who buys 4 or more live animals at auction. Vendors responsible to transport bulls and females to Dubbo.

**“WHEN PROTECTING MY
WEANERS FROM IBR AND MH,
I NEED FAST ACTING SINGLE DOSE
VACCINES AS I ONLY WANT TO
MUSTER ONCE”**

**“THERE’S ONLY ONE
BRD PROGRAM FOR ME”**

BRIAN, CATTLE PRODUCER, NSW

For weaners, IBR and MH are two of the leading causes of Bovine Respiratory Disease. Young cattle are susceptible at weaning. However, rapid control of IBR and MH is easy. Just one spray of **Rhinogard for IBR** and one shot of **Bovi-Shield MH-One** delivered **one time** on-farm, and your weaners are covered. There’s no need to muster twice.

**Don’t wait! Rapid BRD protection is available
from your cattle vet and local reseller now.**

**ONE SPRAY
ONE SHOT
ONE TIME**

2024 SHORTHORN YOUTH EXPO

The Shorthorn Youth Committee are excited to announce that for the second year in a row, our annual heifer expo will be held in Dubbo, NSW from the 4th-6th of October. With the inclusion of new and exciting educational workshops for competitors this year's show is a great opportunity for members to develop industry connections and form new friendships whilst competing and participating in junior competitions.

Stay connected and up to date with all things Shorthorn Youth on our Social Media platforms or contact us directly via email. We cant wait to see you in October!
